

Rigid Shaft Coupling split

KBST2-G

Order Code for Standard Coupling

KBST2-G - 50

Type

Size

This coupling will automatically be supplied with unique bore 50H7.

Order Code for Coupling with
different Bore Diameters**KBST2-G - 50 - 45 - 48**

Type

Size

D1

D2

This coupling will be supplied with the dimensions of type KBST2-50 but with a bore combination 45H7 - 48H7.

Rigid Shaft Coupling split - Steel blackened

Size	Torque Steel Nm	Dimensions								Screws (ISO4762)	Tightening Torque Screws Nm	Mass g
		Standard Bore Ø D1 H7	different Bores Ø D1 / D2 H7 min-max	Ø A mm	Ø B mm	L mm	C1	C2	H

Keyways

according DIN 6885/1 are possible for all bore combinations.

Rigid Shaft Coupling split

KBST2-G

Order Code for Standard Coupling

KBST-G - 80

Type

Size

This coupling will automatically be supplied with unique bore 80H7.

Order Code for Coupling with
different Bore Diameters

KBST-G - 80 - 75 - 90

Type

Size

D1

D2

This coupling will be supplied with the dimensions of type KBST2-80 but with a bore combination 75H7 - 90H7.
